	MV660-20		MV2310-60
	MV660-40		

Optical filters are a crucial component of vision systems in that they spectrally enhance what the system can see, boosting contrast by transmitting the wavelengths you want, while rejecting the wavelengths you don't.

Our optical filters offer:

- ▶ High contrast (signal-to-noise)
- ▶ Tightly toleranced spectral precision
- ▶ Designed for use in a wide range of vision systems
- ▶ Constructed of durable sputtered dielectric interference coatings
- ▶ Designed for excellent performance from 0-20deg half-cone
- ▶ Affordable customized solutions
- ▶ Lifetime warranty

For custom filters, consultation or OEM volume pricing, call 800-824-7662 or email sales@chroma.com to discuss your specific needs.

*All filters priced for threaded mount. Custom mounting or unmounted filters are available through a custom quote.

**Some sizes may not be available on our website as a catalog part, but we are able to accomodate all standard sizes and many custom sizes of our filters. If you do not see the size you need, reach out to our sales team at sales@chroma.com
